Horizon, Sunderland – February Progress Update

Work on site is moving ahead at pace, with installation of the new windows nearly complete.

Top floor windows are expected to be installed prior to the week commencing 25th February. Ground floor windows will be installed toward the end of the build, in order to avoid damage from other materials entering and exiting the building.

Internally, strip-out is nearly complete and partitioning is well-underway, with some floors already being fully sectioned and first fix electrics going in.

The development remains on target to complete in July 2019.
