

# oxygen

PICCADILLY MANCHESTER

Our luxury Oxygen development has started to dominate the skyline with the core between towers 2 and 3 now at full height, whilst the core between towers 1 and 2 is currently stood at 27-storeys – due to reach the full height of 32-storeys in October. The floor slabs are currently at floor 10 in tower 1, floor 8 in tower 2 and floor 5 in tower 3. Externally, the façade brickwork to the townhouses has started and is up to first floor height.
